

ID: loan_application

Textual Workflow Description: Retrieve the credit score details of the user with the specified ID. If the user's credit score is above 700, create a message including that the credit is approved. If the credit score is between 400 and 699, write a message including a request for providing further financial documents and send. If lower than 400, write a message to not approve the credit request. Send the drafted messages via email to the client

Workflow Representation in BPMN and Text

Required iterations: 2

send email to client: request for further financial documents -> End
EXCLUSIVE: check credit score -> create message: credit approved [condition='credit score > 700']
& create message: request for further financial documents [condition='400 <= credit score <= 699']
& create message: credit request not approved [condition='credit score < 400']
create message: credit approved -> send email to client: credit approved
create message: request for further financial documents -> send email to client: request for further financial documents
-> retrieve credit score details of user with specified ID
send email to client: credit approved -> End
retrieve credit score details of user with specified ID -> EXCLUSIVE: check credit score
send email to client: credit request not approved -> End
create message: credit request not approved -> send email to client: credit request not approved
