Execution of task: get article about Waldkirch from Wikipedia get\_wikipedia\_page is selected with arguments: {'page': 'Waldkirch'}

Output of the function: ('wikipedia\_text': 'Waldkirch () is a town in Baden-Württemberg, Germany, located 15 kilometers northeast of Freiburg im Breisgau. While the English translation of its name is Forest Church, it is known as the "town of mechanical organs", where fairground organs played on the streets were long manufactured by such well-known firms as Carl Frei (later of Breda, Netherlands), Andreas Ruth and Son, and Wilhelm Bruder and Sons. The largest employers today are SICK AG, which manufactures optical sensors, Faller AG, which prints pharmaceutical packages and inserts, and Mack Rides, which exports amusement park and water park rides worldwide. Cultural events include the Klappe 11 Cinema festival, the Organ Festival and the Peter Feuchtwanger Piano Masterclass.\n\nGeography\nthumb|300px|Waldkirch from Kastelburg in spring...\nthumb|...and in winter, with the Kandel mountain in the background\n\n Geographic Location \nThe town lays by the Elz River, in the south-western part of the Black Forest. The neighbouring municipalities in the Elz valley are Freiamt, Gutach im Breisgau and Simonswald, in the south-eastern branch of the Simonswälder valley. The district is bordered by Sankt Peter, Glottertal, Denzlingen and Sexau. Waldkirch is located directly at the foot of the Kandel mountain, which is 1241 m high. The lowest point of Waldkirch is 243 m high, the difference in altitude in the district is 998 m.\n\nDue to its location in the Upper Rhine Plain occasionally there are some small earthquakes. The last major earthquake with a magnitude of 5.4 on the Richter scale occurred on December 5, 2004, with the epicenter below the Kandel massif.\n\nSubdivision on the town\nThe districts Buchholz, Kollnau, Siensbach including the road towards it ("Siensbacher Weg"), Suggental and Waldkirch belong to the town of Waldkirch. The boundaries of the districts are the same as those of the former independent municipalities. With the exception of the Waldkirch district, the official name of the districts is given by prefixing the name of the city and connecting it to the name of the respective district by a hyphen. The districts Buchholz, Kollnau, Siensbach as well as Suggental are localities ("Ortschaften") according to the Baden-Württemberg municipal regulations. The local councillor ("Ortschaftsrat") and the local head of town ("Ortsvorsteher") are directly elected by the eligible voters in local elections. In the villages there are administrative offices called "Stadt Waldkirch -Ortsverwaltung". \nThe Buchholz district includes the village of Buchholz and the hamlet of Batzenhäusle. The Kollnau district includes the village of the same name and the farms Harnischwald, Kohlenbach and Übental. The Siensbach district, including the Siensbacher Weg, includes the hamlets of Obertal (Dobel), Untertal and Zinken, the Biehl and Mühletal farms as well as the residential areas Beim Rechen and Eichbühl. The Waldkirch district includes the town of the same name, the hamlet of Heimeck, the farms of Dettenbach, Eschbach, Petershöfe and Wegelbach as well as the residential areas of Altersbach, Forstsiedlung and Kandelrasthaus. The Waldkirch district also includes the hamlet of Stahlhof, which until 1936 was an independent district together with the districts of Dettenbach, Heimeck, Petershöfe and Wegelbach, the castles of Kastelburg and Schwarzenburg as well as the abandoned ruines of the castles of Küchlinsburg (of the Küchlin family) and Kyffelburg and the abandoned town of Weiler.\n\n History \nThe earliest known mention of Waldkirch is the foundation of the Saint Margaret convent, by the Swabian duke Buchard II around the year 918. The settlement was later under the rule of the Schwarzenbergs, who built the Kastelburg and the Schwarzenburg alongside the settlement in the 13th Century, also adding a city wall.\nSchwarzenberg governors gave city law to Waldkirch on the 8th of August 1300. The von Rechbergs inherited the territory in 1457, followed by Sebastian von Ehingen in 1546 and Hans Raphael of Reischach in 1560. In 1567 Archduke Ferdinand of Austria gained rule over Schwarzenberg with the city of Waldkirch and from 1805 onwards, Waldkirch was the official city of Further Austria. The city then fell to the Grand Duchy of Baden, and was the official city of the district of Baden until 1936. Since then it has belonged to the district of Emmendingen.\nAfter WW2, which the city survived largely undamaged, Waldkirch belonged to the federal state of (South) Baden and was made part of the newly built federal state of Baden-Württemberg in 1952. The present day city was reformed as part of the municipal reform on 1 January 1975. The reform was achieved through unification of the city of Waldkirch and the towns Buchholz and Kollnau. The city was renamed Waldkirch-Kollnau on the day of reform. On 1 July 1971 and 1 January 1973 respectively, Suggental and Siensbach were incorporated into Waldkirch. On 1 January 2009 Waldkirch was given the status of district capital.\n\n Coat of arms \n Description \nThe arms of Waldkirch is in the canting arms style. The field of light blue has centered between supporters of lime (left) and oak (right) branches a silver church with a red roof and golden cross topping six hills in dark blue. The church refers to the name of the city. The six hills are based on the coat of arms of the Barrens of Swarzenberg. The arms is based on the oldest known seal from the 13th Century and was given to the city on 5 May 1976.\n\n Old coat of arms \nBetween 1634 and 1976 the city used a coat of arms without the six hills. This arms had a blue and green background above and below the depicted double towered church, the right and left lined with two silver trees. Shown at the bottom of the coat of arms were three more silver trees.\n\nSights\n The Catholic Church St. Magarethen\n The ruin of the Kastelburg\n The market place with the town hall\n Elztalmuseum, many examples of the mechanical organs built in the town\n\nTwin towns - sister cities\n\nWaldkirch is twinned with:\n Charleroi, Belgium\n Chavanay, France\n Liestal, Switzerland\n Sélestat, France\n Worthing, England, United Kingdom\n\n Economy and Infrastructure \n\nWaldkirch has a long history of industry and craftsmanship. The tradition of gemstone cutting, which reaches back to the Middle Ages, is still upheld today by the Wintermantel company. Organ building in Waldkirch, first established by Matthias Martin in 1799, grew to include barrel organs and orchestrions in the 19th century, gaining worldwide renown well into the 1920s. The organ builders Jäger and Brommer, Paul Fleck Söhne, Achim Schneider and Wolfram Stützle continue the tradition to this day. During the industrial revolution,

```
Waldkirch - along with the entire Valley of the Elz - was an important location of the textile industry. Of this tradition, all that remains today is the Gütermann
company in the neighboring community of Gutach. In contrast, optical and electrical manufacturing, represented in Waldkirch by the company SICK AG, has been
enjoying steady growth since World War II, as has paper manufacturing represented by the company August Faller GmbH.\nSince 1877, a successful viticulture
has been established in the district of Buchholz, which is also known trans-regionally for its cultivation of fruit and berries. In the district of Suggental, several
silver mines were in use during the Middle Ages. Some parts of the mines are being uncovered and made accessible again by the mining research team
Suggental, and tourist visits can be arranged ("Silberbergwerk Suggental"). \nTourism is another important economic sector for Waldkirch, which is located
alongside the German Clock Road ("Deutsche Uhrenstraße"), and is also a part of the Network of German Organ Road ("Kulturnetzwerk Deutsche Orgelstraße").
\nFriends of winter sports will enjoy the ski lifts on the local mountain, the Kandel. The most challenging slope is the partial valley run "Nordhang" (northern
slope).\nSince April 30, 2016, Waldkirch has a new public open-air swimming pool in the district of Kollnau.\n\n Transportation \n\nthumb|Bahnhof
Waldkirch\n\nWaldkirch is located along the Federal Highway ("Bundesstraße") 294 between Bretten and Freiburg im Breisgau. The road circumvents the town
through the Hugenwaldtunnel to the south. The Kandel road ("Kandelstraße"), which starts at the northeastern edge of town, has connected Waldkirch to the
Kandel since its construction in the 1930s, and was extended in the 1950s to the village of St. Peter. \nWaldkirch train station can be reached by the Elz Valley
Railway ("Elztalbahn"), which is serviced by the regional railway operator "Breisgau S-Bahn" and runs half-hourly between Freiburg im Breisgau and Elzach. In
addition, Waldkirch is serviced by two regional bus lines. The nearest railway station with access to long-distance trains is "Freiburg Hauptbahnhof" (Freiburg
main station). Waldkirch is part of the regional public transportation authority "Regio-Verkehrsverbund Freiburg".\nThe nearest international Airports are the
EuroAirport Basel/Mulhouse/Freiburg, Zurich, Frankfurt, Stuttgart, the Airport Karlsruhe/Baden-Baden and Strasbourg.\n\n Local Businesses \n\nthumb|Hauptsitz
der Sick AG\n\nSome of Waldkirch\'s businesses are well-known beyond the immediate area, and a few operate worldwide - even as global market leaders in
their field.\nOrgan building is still an active trade, conducted by Jäger and Brommer, Paul Fleck Söhne, Achim Schneider and Wolfram Stützle.\nMack Rides, a
family business founded in Waldkirch in 1780, is one of the leading suppliers of amusement rides. Its former exhibition area in Rust is now home to the Europa
Park, Germany\'s largest theme park.\nAnother company located in Waldkirch is SICK AG, a manufacturer of industrial sensors and optical technology, with more
than 8000 employees worldwide.\nThe local company Ganter Interior is an owner-operated family business with a global market presence in interior construction
and shop fitting.\nAugust Faller GmbH is another family business with its headquarters in Waldkirch, which was founded in 1882. It is one of the market leaders in
pharmaceutical secondary packaging in German-speaking countries.\n\n Courts and Administration \n\nWaldkirch is the seat of the Waldkirch district court
("Amtsgericht Waldkirch"), which is part of the state court district of Freiburg im Breisgau, and the higher state court ("Oberlandesgericht, OLG") district of
Karlsruhe, as well as the Notary\'s office for the municipalities of the Elztal. The former court prison next to the district court building was used as a branch of the
Freiburg Prison ("JVA Freiburg"), housing day release prisoners. Since the closure of the prison branch, the building has been used as an office complex. Up until
2007, the city also housed the seat of a deanery for the Roman Catholic Archdiocese of Freiburg\n\n Education \n\nSchools located in Waldkirch include the
Geschwister-Scholl-Gymnasium, the Realschule Kollnau, the primary school Schwarzenbergschule, the primary school and Hauptschule Kastelbergschule, the
primary school and Hauptschule Buchholz, and the primary school and Hauptschule Kollnau. It also houses a centre for special education for students with
learning difficulties, as well as a special needs school for students with visual impairments, the "Staatliche Schule für Sehbehinderte St. Michael", and finally, the
vocational school center "Berufliches Schulzentrum Waldkirch". Another important educational facility is the municipal music school ("Städtische Musikschule").
There is also a private school, the "Freie Schule Elztal". Additionally, the city runs a full-day program at the primary school and Hauptschule Kastelbergschule, as
well as a child day-care center. So childcare for all ages between 0-16 years is being provided all under one roof.\n\n Culture and sights \nWaldkirch is situated
on the German Clock Road, which passes many exhibition venues of ancient clocks and watch factories.\nThe town is member of Cittàslow, a Slow movement
started in Italy in 1999 to increase the quality of urban life.\n\nMonuments\n The town chapel of Our Lady is the oldest preserved building in town. The building
dates back to 1336 and was established by the townspeople, so that they would not have to go to the St. Walburga Parish Church at that time outside the town
walls, which was difficult in winter and dangerous in times of war.\nThe chapel was rebuilt in 1931 and extended by the choir, in which the baroque high altar is
placed. The side figures of this altar are attributed to Christian Wentzinger.\nIn the church are images showing Stations of the Cross, which were created by
Georg Scholz in the year 1938. He also briefly served as Mayor of the city after the end of the Second World War, before he died. The organ was built in 1894 by
the organ builder Anton Kiene from Waldkirch and replaced an instrument from 1844.\n The Catholic town church of St. Margarethen (former collegiate church of
the Collegiate Abbey of the same name), built in 1732-1734 by the Vorarlberg Baroque architect Peter Thumb.\n Church square with a completely preserved
ensemble of baroque former canonist houses of the Collegiate St. Margarethen\n Market square with historical buildings, including Waldkirch\'s town hall\n Ruin
of Kastelburg\n Ruin of Schwarzenburg\n Buchholz Castle\n\n Museums \nThe Elztalmuseum, Kirchplatz 14, housed in the baroque former provost building,
displays not only regional folk art and historical documents, but also important examples of Waldkirch barrel organ and musical instrument making. The latter is
also shown at the Organ Builder\'s Hall, Am Gewerbekanal 1, which is run by the Waldkirch Orgelstiftung.\n\n Other sights \n The gemstone cutting company
Wintermantel, which is protected by the cultural heritage management, is one of the largest and oldest craft gemstone cutting shop preserved in the original and
still in operation. It is the last remaining representative of a significant craft tradition in Breisgau.\n The Black Forest Zoo in the immediate vicinity of the
recreational facilities of the city lake is an attraction for children and families.\n The medieval silver mine Suggental offers tours by appointment.\n The treetop
path.\n\n Regular events \nEvery three years, the Waldkirch Organ Festival takes place. In the same interval, the historic marketplace festival takes place in
Waldkirch in July.\n\nln addition, the tradition of the Swabian-Alemannic carnival is maintained in Waldkirch. It takes place in the week leading up to Lent. The
Narrenzunft "Krakeelia" Waldkirch, a carnival guild, is one of the oldest in the region. At the "Schmutziger Dunschdig" (Dirty Thursday) traditionally the opening of
the carnival takes place with a subsequent traditional procession. Two days later, Saturday, the Witches Sabbath of Kandelhexen takes place. Furthermore, the
carnival parade through the city takes place on Sunday. On Rose Monday there is the traditional Elfimess (carnival speeches and drinks) for men. Among the
customs of the Fasnet in Waldkirch is also the "Kläppere" (a type of wooden musical instrument), in which two "Kläpperli" are used to make music by rhythmical
flapping.\n\nThere are regular cultural events in the AJZ Waldkirch e. V. as well as the municipal cinema of "Flap 11".\n\n Sports \nThe SV Waldkirch is the
largest sports club in the town. The first men\'s football team was Southern Baden Champion in 1969 and 1970 and Southern Baden Cup winner in 1972 and
2014 . The football department has been independent since 2016 as FC Waldkirch.\n\n People \n Honorary Citizens \n Maria Luise FrickNachruf: Ehrenbürgerin
Maria Luise Frick ist gestorben. Badische Zeitung, 29 January 2018. (1926–2018) was made an honorary citizen in 1992\n\n Notable residents \n Mathias Martin
(1765–1825), founder of barrel organ building in Waldkirch\n Ignaz Blasius Bruder (1780–1845), barrel organ builder\n Karl Jäger (1888–1959),
SS-Standartenführer (a mid-ranking official of the SS in Nazi-Germany) and organiser of the Holocausts in LithuaniaWolfram Wette: Der Waldkircher Hitler
Spiegel Online 10 March 2008, retrieved 26 December 2014.\n Georg Scholz (1890-1945), German realist painter, part of the New Objectivity art movement\n
Wolfram Wette (born 1940), historian\n Richard Leibinger (born 1949), politician (SPD), mayor of Waldkirch from 1983 to 2009, Lord Mayor from 2009 to 2015.\n
Roland Mack (born 1949), entrepreneur and founder of the Europa-Park\n Alexander Schoch (born 1954), politician (Bündnis 90/Die Grünen), member of the
Landtag of Baden-Württemberg (State Parliament) since 2011\n Peter Weiß (born 1956), politician (CDU), member of the Bundestag (the German federal
parliament) since 1998, chair of the working group Labor and Social Affairs of the CDU/CSU-Bundestagsfraktion since 2018.\n Jürgen Mack (born 1958),
entrepreneur\n Heiko Herrlich (born 1971), former soccer player, now active as a coach and sports manager\n Roman Götzmann (born 1982), politician (SPD),
Lord Mayor of Waldkirch since 2015\n\n Notable people born in Waldkirch \n Balthasar Merklin (1479 in Waldkirch - 28 May 1531 in Trier) was administrator of
the former Benedictine monastery St. Margarethen in Waldkirch, kaiserlicher Rat (advisor of the Holy Roman Emperor), Vizekanzler (vice-chancellor) of the Holy
Roman Empire, and Bishop of Hildesheim and Konstanz.\n Ursula Gatter (died August 1603), washerwoman und mother of Agatha Gatter (born 1589), victim of
